SV-5
AUXILIARY SELECTOR WITH
LINE LEVEL ATTENUATOR

INTRODUCTION

The Niles Audio SV-5 is a five-input/one-output selector box that enables you to expand your hi-fi's auxiliary input to accommodate up to five different line level sources such as compact disc players, tape decks, tuners, and component television sets. You select the desired source by simply turning a knob. A passive volume attenuator enables you to adjust the volume of each sound source. In a way, owning an SV-5 is like owning a "passive preamp".

The volume attenuator is sealed and is made of an extremely low noise conductive plastic. The attenuator control has a nominal value of 100k ohms. The unit has a silky smooth feel and will provide many years of trouble free use.

CONNECTIONS - refer to the illustration on the reverse side for details.

All connections to the SV-5 are made with standard double-male RCA phono cords available through any hi-fi dealer or electronic parts supply house.

1. Connect the SV-5's rear panel jacks labeled "TO HI-FI AUX IN" to your receiver's AUXILIARY input.
2. Connect each of your auxiliary sources to the remaining five sets of jacks on the rear of the SV-5.

OPERATION

Operation is straightforward. Place your receiver's input selector in the AUX position and then select the source you desire by simply rotating the left hand front panel knob on the SV-5. The right hand knob adjusts the volume of the selected source.

SPECIFICATIONS

INPUTS: 5
OUTPUTS: 1
LEVEL CONTROL IMPEDANCE: 100K OHMS
CONNECTORS: RCA TYPE PHONO JACKS
DIMENSIONS: 5 3/8" W X 2 5/8" H X 5" D
